

Your lunchtime crash course on going solar.

Switch Together Solar 101

Thinking about solar but not sure where to start? Spend an hour with us and get the full picture, from how panels actually work to what they'll cost you. Join us for:

- A presentation from Solar United Neighbors covering solar technology, economics, and financing. You'll also learn how the Switch Together program works, and how **group buying gets members better pricing.**
- Hosted on the 4th Wednesday of the month at noon from June through October. **Free to join, and there's zero obligation to buy.** Come learn, ask questions, and decide on your own timeline.
